## SKILLS

**Languages**: C++, Java, Python, JavaScript
- **Frameworks**: HTML and CSS, NumPy, Pandas, Matplotlib, Scikit-learn, Django, Flask
- **Tools/Platforms**: Figma, VS code, MS Excel, Power Bi, Tableau
- **Core CS Fundamentals:** DBMS, OS, OOPs, CN
- **Soft Skills**: Problem-Solving, Team Work, Adaptability, Leadership

## PROJECTS

**Blinkit Sales Analytics Dashboard (Power BI) |** Dec' 25 – Jan' 26
- Developed an interactive Power BI dashboard to analyze Blinkit sales data, tracking ₹1.20M total sales, 9K+ items, and average ratings using data modeling, DAX measures, and KPI visuals.
- Conducted outlet-wise performance analysis across Grocery Stores and Supermarket Types to compare sales, item counts, and averages using Power BI tables, DAX, and comparative.
- Evaluated sales trends by outlet location (Tier 1–3) and outlet size (Small, Medium, High) to identify high-performing segments using slicers, filters, bar charts, and donut visuals.
- Performed product category and fat-content analysis (Low Fat vs Regular) to understand customer buying behavior, leveraging DAX calculations, interactive dashboards, and visual storytelling.

**Tech Stack:** Power bi,DAX, Power Query, Data Modelling,Data Visualization,Bussiness Intelligence Analytics

**Rainfall Prediction using Machine Learning** Nov'25 – Dec'25
- Designed and deployed a machine learning–based rainfall prediction solution by analyzing historical meteorological data to identify trends and generate accurate rainfall forecasts.
- Applied rigorous data preprocessing and exploratory data analysis (EDA) techniques, including feature engineering and correlation analysis, to improve data quality and model effectiveness.
- Developed, trained, and benchmarked supervised learning models, selecting the optimal algorithm based on metrics such as accuracy and consistency.
- Implemented a full end-to-end ML pipeline in Python, utilizing Pandas, NumPy, Matplotlib, and Scikit-learn to manage data processing, visualization, model training, and evaluation.

**Tech Stack:** Python, Pandas,Numpy, Matplotlib, Scikit-learn, ML, EDA, Feature Engineering, Model Evaluation

## SUMMER TRAINING

**Bias Buster : AI-powered Chrome Extension** May'25– Jul'25
- Developed an AI-driven Chrome extension to detect and reduce media bias in online articles, integrating advanced NLP models for sentiment, stance, and linguistic framing analysis to enhance credibility evaluation, Implemented real-time text scanning and highlighting of biased phrases, with suggestions for neutral rewording to promote balanced content.
- Implemented real-time text scanning and automated highlighting of biased or emotionally loaded phrases, adding context-aware neutral rewording suggestions and a bias severity score to help users consume balanced information.
- Leveraged TensorFlow.js and Hugging Face Transformers for fast, on-device inference, enabling privacy-preserving, low-latency bias classification without relying on external servers or cloud APIs.

**Tech Stack:** HTML, CSS, JavaScript, Machine learning, NLP, Chrome extension APIs

## CERTIFICATES

Controllers Job Simulation – Forage | Link Feb' 26
Quantitative Research Job Simulation | Forage | Link Jan' 26
Sql basic | HackerRank | Link Dec' 25
Master Generative AI & Generative AI tools (ChatGPT & more) - Udemy | Link Aug' 25
Computer Communication – Coursera | Link Dec' 24

## ACHIEVEMENTS

Solved 100+ coding problems accross **LeetCode, GFG** Dec' 25
Earned the LeetCode 50-Days Coding Challenge Badge, demonstrating long-term consistency Dec' 25

## EDUCATION

**Lovely Professional University** Phagwara, Punjab
*Bachelor of Technology - Computer Science and Engineering;* ***CGPA:6.7*** *Aug' 23 - Present*

**B.H College** Howly, Assam
*Intermediate(PCMB);* ***Percentage: 88%*** *Apr' 19 – Mar' 21*

**Barnagar Vidyamandir** Sorbhog, Assam
*Matriculation;* ***Percentage: 80%*** *Apr'18 – Mar'19*
